

Avast® Business Content Filtering

Protecting your customers while surfing

Your small business customers know they are losing productivity when employees shop and social network on company time. Avast Business Content Filtering allows them to increase productivity with advanced, real-time content filtering and the ability to block access to the websites that drain time and money from their business.

Drive productivity

Avast Business Content Filtering helps your customers drive productivity by limiting access to social networking, searching and shopping to approved times. And, because less bandwidth is absorbed by personal use, that means more speed for business tasks.

Save time and money

Helping boost your customers' productivity involves no start-up costs as no new hardware or network changes are required. It's quick and easy to do with out-of-the-box templates for quick and automatic policy setting. No proxy is necessary courtesy of our patented V-routing technology, which requires none of the rerouting of traffic or other methods that degrade Internet speed.

Stay informed and in control

Know what's happening on every device, at all times with instant alerts by email. Set flexible policies for in the office, at home or on the road and allow access for employees to specific sites. With real-time policy updates to devices, management of this service couldn't be simpler.

Protect against threats

Avast Business Content Filtering prevents users from bringing security risks into the business by automatically stopping access to sites known to deliver spyware, malware and other threats. It also lets you automatically block sites by category with over 60 million sites sorted into subgroups and use flexible Block/Warn Only/Allow options to control the risk.

PROTECTION

Avast Business Content Filtering puts you in control.

Easily limit the websites that employees may visit and improve your customers' protection. Simple and free to

set up, Avast Business Content Filtering is the fast, flexible and highly accurate way to help your customers boost productivity.

FEATURES

NO PROXY REQUIRED

Our patented V-routing technology does not require rerouting of traffic or other methods that degrade Internet speed.

SECONDARY LOCAL PASSWORDS

Create a secondary, local password to override locked pages without compromising the administrative password.

OUT-OF-THE-BOX TEMPLATES

Use out-of-the-box templates for quick and automatic policy setting and set flexible policies for in the office, at home or on the road. Create new default templates specific for desktops and laptops that can be re-used across customers for easier policy management.

EMAIL ALERTS

Know what's happening on every device, at all times with instant alerts by email.

PUSH POLICIES

Push real-time policy and group updates to specific endpoints from the cloud.

AUTOMATIC SITE BLOCKING

Automatically block sites by category – over 60 million sites sorted into subgroups for increased granularity.

Use flexible Block /Warn Only/Allow options for employee access to specific sites.

PROVIDE A SECOND LINE OF DEFENSE

iCat Dynamic Filtering scans any pages not yet categorised in our database to ensure new threats don't slip through.

REPORTING

Receive historical reports on user activities including what sites they visit, at what time and for how long.

CLOUDCARE ARCHITECTURE

- SSL 2048-bit encryption in transit
- Private Cloud, fully redundant data centres
- Multiple-layer firewalls with SPI
- Secure user password enforcement
- Compatible with existing firewalls
- Compatible across all browsers

ABOUT AVAST BUSINESS

The Avast Business solutions secure, simplify and optimize the IT experience for small and medium-sized businesses worldwide. As a business unit of Avast Software, channel partners and their end customers gain the confidence of working with a company that is uniquely positioned in the security and managed services market.

Serving over 400 million people and businesses, each device Avast protects and secures acts as a sensor, providing us unparalleled insight into what is happening real-time in our users' world through their connected technologies. Our threat detection network is among the most advanced in the world, using machine learning and artificial intelligence technologies to detect and stop

threats in real time. This gives us unprecedented insight into the lifecycle of cybersecurity attacks, malware, phishing, ransomware and data breaches to deliver the most comprehensive protection against cybercrime to date while delivering products that are easy to purchase, onboard and implement with high-performance.

Avast Business is dedicated to the channel and has a comprehensive partner program in place to support partners with tools and knowledge to successfully position and sell the Avast Business products, effectively secure SMBs, and enable profitable channel growth. Partners can access cloud and hosted services for their end customers.
