

Release Notes: Avast Business Cloud Management Console (June 5, 2019)

Console version: 7.7

Agent version: 4.14

Windows Antivirus: 19.5

Mac OS X Antivirus: 13.12

Release Summary

This release contains improvements and bug fixes to our Avast Business Cloud Management Console.

Improvements

[CBC-7782]	Realsite and WiFi Inspector components will no longer be installed onto Windows Server operating systems and will not show under the Server device settings.
[CBC-8448]	We have made some updates to how different status' appear in the console when at least one service has expired. This will help understand which service has expired for which devices.
[CBC-7674]	Avast Business Technical Support phone numbers are now available through Help & Support > Contact our support > list of phone numbers will now appear based on geo.

Resolved issues

[CBC-8471]	Fixed dead link from Date added row under Device Overview page. The Learn why this occurred link now links to the correct PDF documentation.
------------	--
