

# Release Notes: Avast Business Antivirus 19.3 (April 9, 2019)

## Windows Antivirus: 19.3

### Release Summary

This release contains new improvements and bug fixes to our Avast Business Antivirus client.

Avast Business Antivirus 19.3 will be available for new installations on **April 9, 2019**. All existing devices with Avast Business Antivirus 18.8 or lower will start the automatic upgrade to 19.3 at a later time.

If you wish to upgrade your devices to 19.3 prior to the automatic upgrade, then you can create a new Task (Update device – Program update task) from your console.

A system reboot will be required, however, the user can postpone the reboot. There will be no forced reboot of devices.

### Improvements

[AV-16747]	We now offer a 64-bit version of our Avast Business Antivirus client. Some benefits to this include: <ul style="list-style-type: none"> <li>- Faster boot time</li> <li>- Reduced size of VPS files</li> <li>- Reduced installer file size</li> <li>- Faster scanning of mapped files</li> <li>- Support ARM64 build in the future</li> </ul>
[AV-18894]	Redesign of the Smart Scan UI
[AV-16840]	We've hidden some new advanced settings— just search for 'geek:area' in your settings
[AV-18347]	A safer UEFI - Anti-rootkit scan now protects your UEFI (unified extensible firmware interface)
[AV-18647]	We've updated the look of our Custom Scans screen
[AV-16097]	We've simplified our settings screens and even added direct links from our feature screens to their settings

[AV-16097]	We've added a search bar to our settings to make it easier to find what you need
[AV-16631]	Our Firewall's network detection is now better than ever

## Resolved issues

- [CBC-7738] Remote Deployment will now display over 1000 devices from Active Directory
- [CBC-7287] Fixed high CPU usage on Windows 10 devices
- [AV-18553] Improved the syncing speed of our tray icon
- [AV-19023] Made our Outlook plugin work again on x64 systems running x86 Outlook
- [AV-19142] Thawed out an annoying UI freeze some of you were experiencing
- [AV-18884] Possibility to edit exceptions
- [CBC-7521] Fixed our boot-time scan
- [AV-19263] Made sure our UI loads correctly ("white UI" problem)
- [AV-11138] Fixed a bug for our users in Russia where Passive Mode sometimes turned on for no reason
- [AV-18109] Boot-time scan results can now be found in scan history
- [AV-18058] Fixed improper arrangement in our Web Shield detection (threat type and URL were switched)
- [AV-18695] Settings can now be backed up and restored again (recommended for un-managed devices)
- [AV-15622] Behaviour Shield exclusions now accept additional character form
- [AV-19353] Default network is now set to Public in Firewall
- [AV-18785] avastsvc.exe will no longer delete local proxy information
